Typical defects in I18N are:

- Broken encoding (If the application uses an encoding that doesn't support Chinese hieroglyphs, we'll see square symbols in case we switch to a Chinese locale);
- When the application doesn't support local calendars, date formatting and time formatting;
- Issues with separators in numbers;
- Issues with font directions.

Typical defects in L10N:

- Using different names for the same element in different parts of the application;
- Issues with content translation for some locales;
- Wrong size of the buttons for some locales;
- Application doesn't support some fonts;
- Issues with the path to system folders.
